

Victorin Randrianasolo

Full Stack Developer – Web Applications, Business Platforms and Digital Solutions

Full Stack Developer with experience designing and developing complete web applications, from backend (REST APIs, databases) to frontend (modern interfaces using React, Vue.js, Next.js).

I have worked on various projects including ERP systems, management platforms, and custom web solutions, handling development, deployment, and performance optimization.

Autonomous and results-oriented, I build reliable and scalable solutions tailored to real business needs.

Technical Skills

Backend

- PHP (Laravel, CodeIgniter)
- Java
- Python
- REST API design

Frontend

- HTML, CSS, SCSS
- JavaScript, TypeScript
- Frameworks : Next.js, React, Vue.js
- UI : Bootstrap, Tailwind CSS

Databases

- SQL: MySQL, PostgreSQL, Oracle
- NoSQL: Firebase
- Database design and optimization

CMS

- WordPress, PrestaShop, Shopify, Wix

Deployment & Infrastructure

- Vercel (web application deployment, especially Next.js)
- Netlify
- OVH (domains, DNS, professional emails)
- Cloudflare (DNS, security, CDN)

Web & Marketing digital

- SEO (Search Console, Semrush, TextGuru)
- Google Analytics
- Google Ads
- Google Business

Education & Training

Bachelor's Degree in Computer Science

2020-2024

ITU, Andoharanofotsy

DEL F B2 – French Language Certification

2023

Alliance Française

Key Academic Projects

- **Development of a running event management web application using Laravel (internship evaluation project)**
 - Web development using HTML, CSS, JavaScript, and AJAX
 - Backend development with Laravel (PHP framework)
 - RESTful API development
- **Furniture Management System (Project Manager)**
 - Database design and modeling
 - Project management and task distribution
 - Coordination of a team of 3 developers

Professional Experience

IT Discovery Internship – OPHAM, Andotapenaka (1 month) June 2020

- Gained insight into a professional IT environment
- Developed and maintained Java applications
- Learned software development practices and teamwork

Website Redesign – DGI (3-month internship) August – October 2024

- Backend: Migrated a legacy PHP website to Laravel (MVC architecture, Eloquent ORM, authentication, REST API)
- Frontend: Redesigned the interface using Vue.js (reusable components, state management, integration with Laravel)

Languages

- French : B2 (Alliance Française)
- English : C1 (EF SET)

Soft Skills

- Teamwork
- Adaptability
- Time management
- Attention to detail

Interests

- Music
- Video games
- Puzzle
- movies
- Travel

ERP Developer – Dessineo (4-month internship + October 2024 – August 2025 7 months experience)

- Developed and automated the employee time-tracking system
 - Processed ERP data and built a functional mobile time-tracking prototype using React Native (3 months), later paused due to project priorities
 - Fixed bugs related to leave management, overtime recovery, employees, penalties, and permissions
 - Managed user account recovery and reset processes
 - Worked on multi-user systems and ensured smooth front-end / back-end integration
- Technologies: Laravel, PHP, Vue.js, JavaScript, AJAX, Python, CSS, MySQL, Radmin
- Skills: ERP systems, process automation, bug fixing, full-stack integration, multi-user systems

Freelance Web Developer

Scandale Bouffe (August 2024 – February 2026)

- Developed a complete restaurant management system
- Frontend: React (responsive UI), deployed on Netlify
- Backend: Laravel (inventory, salaries, roles, orders, API)
- Customer module: online ordering, shopping cart, and order confirmation
- Improved SEO (Google indexing and performance optimization)
- Built a modular frontend architecture using React and REST APIs, scalable for a future React Native mobile application

M.A Concept — Architect Portfolio (August 2025 – February 2026)

- Designed and developed an interactive professional portfolio using React
- Deployed the application on Netlify
- Integrated EmailJS for contact forms
- Ensured alignment with the client's visual identity
- Built reusable React components and managed form logic, with a structure adaptable for a future React Native mobile application

Prisme (February 2026 – Present)

- Architecture and construction firm based in Madagascar
- Developed a modern and optimized web platform
- Frontend: Next.js (SEO-friendly and performance optimized)
- Deployment: Vercel
- Domain & DNS management: Cloudflare Registrar
- Configured DNS and managed production deployment
- Improved SEO and optimized performance (reduced loading time)

Sigma (February 2026 – Present)

- Showcase website for a home automation, security, and electrical company in Réunion Island
- Developed a modern and high-performance website
- Frontend: Next.js
- Deployment: Vercel
- Domain management: OVH
- Optimized performance and page loading speed

Traits d'Esprit (March 2026 – Present)

- Showcase website for an interior and exterior renovation company in Réunion Island
- Complete website redesign with modernized user interface
- Technologies: Next.js, TypeScript
- Deployment: Vercel
- Domain management: OVH
- Improved performance and user experience

Miralux (March 2026 – Present)

- Website redesign (migration from Wix to Next.js) for a home automation, security, and electrical company in Madagascar
- Migrated an existing website from Wix to Next.js
- Technologies: Next.js, TypeScript
- Deployment: Vercel
- Domain management: OVH
- Improved SEO and significantly enhanced loading performance
